### The Annual Inspection

Annually a team of state inspectors pays a surprise visit to all licensed nursing facilities. Their team, which usually includes nurses, a pharmacist, social worker, a dietician and life safety experts generally spend four days in a facility looking at more than 500 areas of the operation for compliance with regulations.

With so many areas under review, a survey with four findings is an accomplishment which takes hard work and dedication.

**Baton Rouge Health Care Center was found deficiency-free on our recent survey.**

At Baton Rouge Health Care Center, we're proud of our staff for their hard work and dedication and their results on the recent survey.
